DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

St. Paul's Episcopal Church is located on the east side of South Liberty Street, just south of Church Lane in Centreville.

Constructed in 1834-1835, this brick church is cruciform in plan, with a later parish hall appended to the east end of the building. The principal entrance is in the west wall of the bell tower, which projects from the center of the west gable, facing Liberty Street. The majority of the building is covered with stucco painted a soft grey.

The bell tower is square in plan, with arched double entrance doors in the west wall and a tall octagonal steeple. The corners of the tower are pilastered and the openings are set back in the recessed area between the pilasters. There is one window above the door and an arched recess above the window. Above this are double arched openings with shuttered wood blinds to mark the location of the bell. The steeple itself has evidently been rebuilt, and is now embellished with small pedimented roofs, one on each facade, and a grey slate
